MetaGuard-UV-700

High Performance Calendered PVC Overlaminate for UV Prints

Product Description

Metaguard UV 700 is a 70 micron polymeric calendered vinyl overlaminate for use with UV Prints. The specially formulated solvent based adhesive gives a high bond to the low energy surface of UV prints and overcomes silvering. Overlaminating with MetaGuard UV 700 provides increased resistance to abrasion and durability of the print, and offers UV inhibitors. It is suitable for interior or exterior applications over flat or semi-curved surfaces.

Material Handling

- This product is suitable for cold lamination using a laminator. Apply around 30°C on the top roller to prevent silvering of the adhesive.
- Ensure that the material has reached room temperature and a relative humidity of 50% before use.

Overlaminating

- Suitable for use on Solvent, Eco Solvent inkiet, UV cured Ink technology and Latex prints on Metamark print media.
- The product is matched to Metamark MD5. Matched laminates prevent tunnelling and delamination.
- Allow the inks to cure before overlaminating, usually 24-48 hours (Not applicable to Latex prints). Failure to do so can cause delamination, tunnelling and shrinkage.
- Refer to www.metamark.co.uk for further application guidelines.
- The user should determine suitability of the overlaminate to the print media.

Warranty: Metamark (UK) Limited warrants to its customers that graphics produced using Metamark Metaguard will remain in good condition without excessive fading or colour degradation for the specified life time of the ink used, when correctly stored, printed and applied in accordance with procedures outlined in the technical literature. If within the specified years of normal use Metamark Metaguard becomes ineffective for its intended use. Metamark will provide sufficient material to produce a new replacement marking, and will at its own discretion, contribute an allowance in additional material towards the costs involved in replacing the graphics. In all cases, the converter is held fully responsible for storing, processing and applying the unconverted materials in accordance with Metamark's technical specifications. Metamark (UK) Limited will not be liable for any indirect or consequential loss or damage, and will not provide any allowance against improper usage, application accident, negligence, chemical damage or improper repair. Please Note: The above data is given in good faith to provide an indication of the performance of the product. Purchasers should consider the suitability of each product for its intended use and the purchaser assumes all risks in connection with such use. Seller shall not be liable for damages in excess of the purchase price of the product nor for incidental nor consequential loss.
